AWAKENING TO HEAVEN WITHIN

AWAKENING WITH A.C.

Week 2: Theory of Relativity

(An Artist Interpretation)

A playful reflection on consciousness, imagination, relativity, love, and the worlds we create.

> *"Through spiritual practice we unlearn what we have learned, and remember we are spirits in a material world."*

Now we all know Albert Einstein's Theory of Relativity. Am I correct?

So. Let's have some fun and creatively look at Einstein's famous equation from the perspective of an artist.

$$Energy = Mass\ (Matter) \times (Speed\ of\ Light)^2$$

Or

$$E = mc^2$$

An Artist Looks at the Equation

Basically:

Energy = Unmanifested Consciousness (i.e. Heaven)

&

Mass (Matter) x (Speed of Light)^2 = Manifested Consciousness (i.e. Earth)

Therefore, logically and creatively:

Unmanifested Consciousness (i.e. Heaven) = Manifested Consciousness (i.e. Earth)

Where the = becomes the observer (i.e. our conscious, thinking minds).

Albert Through an Artist's Eyes

Now manifested consciousness is the projection of our conscious minds, via thought, to create our earthly world of form known as the dimension of duality where relativity exists. Am I right? Therefore, the name Theory of Relativity.

Let's look at some of Albert's most famous quotes.

> *"Matter is spirit reduced to point of visibility."*

This reinforces the idea that the "equal sign" is the observer.

> *"I want to know the mind of God; the rest are details."*

Albert is basically saying, I want to know unmanifested consciousness (i.e. the Divine Mind) and the manifested consciousness (i.e. Matter) is merely details.

> *"Imagination is more important than knowledge. Imagination is the language of the soul."*

> *"Creative energy is more critical than learning."*

> *"The pursuit of truth and beauty is a sphere of activity in which we are permitted to remain children all our lives."*

Albert knew to understand the unmanifested consciousness (i.e. the Divine Mind) you needed the creative energy of your childlike imagination as unmanifested consciousness cannot be learned and therefore understood as knowledge.

> *"The greatest scientists are artists as well."*

Because artists have access to their childlike imagination.

> *"The world we have created is a product of our thinking; it cannot be changed without changing our thinking."*

And this is the purpose of the Awakening Movement: through spiritual practice we, as a collective, can change our thinking and once again access our Artist's mind, and its childlike imagination to get to know the Mind of God (i.e. unmanifested consciousness or love), with the byproduct being creating Heaven on Earth.

> *"One day you have to choose between the world and love, remember this: If you choose the world you will be left without love, but if you choose love, with it you will conquer the world."*

And through our Artist's minds and childlike imagination we will know the mind of God (i.e. love). And this spiritual evolution in thought will change the world from fear (i.e. hell) to love (i.e. heaven), scientifically and artistically speaking.

Because Albert's Most Important Epiphany Was

> *"Love is the answer."*

Ironically enough, given that Albert Einstein considered time as an illusion, Time magazine recognized Albert as Man of the 20th Century, number one. Now I don't have any issue with this choice; however, I may disagree with the reason.

Albert was celebrated in the 20th century for discovering his Theory of Relativity, so humanity could better understand our Earthly existence at the Quantum level. However, I believe he discovered something even more profound. Something well less known. The answer to all questions in a world of relativity. Love is the answer. See what you think?

WATCH

The Power Of Love (attributed to Albert Einstein)

A short reflection on the idea that love may be the answer in a world of relativity.

WATCH ON YOUTUBE

My Bonus Side Note (Assignment)

Interpret Albert's "Theory of Relativity" through these three famous quotes by Jesus Christ.

> *"Truly I tell you, unless you change and become like little children, you will never enter the kingdom of heaven."*

> *"Be in the world, but not of it."*

> *"Now these three remain: faith, hope and love. But the greatest of these is love."*

And I suggest you stretch your childlike imagination and creatively think out of the box. I know you can do it.

My Spiritual Contributor of the Week: Physicist Max Planck

This week's Principle is to better understand consciousness, and I couldn't think of a better spiritual contributor of the week than Physicist Max Planck as he is considered the father of Quantum Physics.

Please give me 10 minutes of your time and watch this video as it will help us as a movement all better understand consciousness and our role, as observers, in the universe.

WATCH

Max Planck: The Father of Quantum Physics Believed in a Divine Mind

I'm using this video as a doorway into this week's exploration of consciousness and our role as observers.

WATCH ON YOUTUBE

Are We Cool So Far?

Okay, this is not a Physics class, and you won't be tested, but this video hopefully gave you a surface level understanding of consciousness.

For example, when unmanifested consciousness (i.e. The Divine Mind or Waves) are observed by the conscious mind (i.e. the observer) it collapses into manifested consciousness (i.e. matter & particles) to create the illusion of our Earthly, physical existence.

Are we cool so far?

And our Earthly existence is an illusion of separation, also known as the dimension of duality, where a sense relativity (i.e. Matter x (Speed of Light)^2) is created.

And the purpose of this sense of relativity is so the Divine Mind (i.e. God or us) can know itself better. That's it.

Through a sense of relativity, the Divine mind will know itself better via, for example, light relative to dark, love relative to fear, and heaven relative to earth.

Making the purpose of the Awakening Movement and its members, via the observer effect (i.e. our loving, heartfelt conscious thoughts) to manifest unmanifested consciousness (i.e. heaven or love) into the manifested consciousness (i.e. earth) to create the necessary relativity for the Divine Mind to finally know itself.

That's it. And when this happens, our will, will be done on Earth as it is in Heaven. As the infinite Divine Mind (i.e. us) will know itself, relatively speaking.

Spiritual Video of the Week: Star Wars - The Empire Strikes Back

Please check out this excerpt from Star Wars - The Empire Strikes Back, when Yoda teaches Luke "The Force", and observe what comes to mind.

WATCH

Yoda Teaching Skywalker Knowing

Watch the scene through a metaphysical lens and simply observe what comes to mind.

WATCH ON YOUTUBE

What came to me is "the force" is nothing more than unmanifested consciousness (i.e. energy). Am I right? As "the force" is in all things, and when you can feel it, you can affect the manifested (i.e. crude matter) which is nothing more than the Max Planck's observer effect.

This means, all of us, in the Awakening Movement, must unlearn what we have all learned, and through spiritual practice, just like Luke, all become Jedis. I'm up for that. Are you?

Now my understanding is George Lucas, the creator of the Star Wars empire, followed the teachings and was a good friend of Joseph Campbell, a major contributor to the Awakening plan. This meant George understood metaphysics and he brilliantly weaved this understanding into the Star Wars saga, using his childlike imagination and Artistic mind. Any arguments? None from me.

So, let's all of us in the Awakening Movement learn how to use "the force" and become Jedis, and create a light relative enough to balance dark side.

> *"Light. Darkness. A balance."*

Sounds like relativity to me. Also, a balance known to the Awakening Movement as Heaven on Earth.

My 2nd Bonus Side Note (Assignment - Optional)

For you diehard Star War fans I'd like you to watch Star Wars again but this time through the prism of metaphysics, where the light (i.e. the force) is unmanifested consciousness and the dark side (i.e. the empire) is manifested consciousness and how we, Jedis in training, must learn to find the balance between the two worlds.

Please share with me your findings as I'm sure you will school me further on the spiritual significance of the Star Wars saga.

Spiritual Song of the Week: "Spirits in the Material World" - The Police

LISTEN

The Police - Spirits In The Material World

Personally, I believe the lyrics to this great song are both timely and speak for themselves.

LISTEN ON YOUTUBE

Personally, I believe the lyrics to this great song are both timely and speak for themselves.

The answer to the question "Where does the answer lie?" is "Love is the Answer", Albert Einstein's most significant epiphany.

And pertaining to another way, the Awakening Movement is the other way. Where through spiritual practice we unlearn what we have learned, and remember we are spirits in a material world, otherwise known, artistically speaking, as Jedis.

And this is where life imitates art. Especially art that came from an Artistic mind and childlike imagination.

> *"Imagination is more important than knowledge. Imagination is the language of the soul."*

Let's all remember that.

My Closing Thought

> *"And of course, let the force be with you."*

Please forward this "Time with A.C." to anyone who may resonate with this spiritual material or the Awakening Movement itself.

A Simple Practice for the Week

Moment	Invitation
Watch	Give the Max Planck video ten unrushed minutes. Notice one idea that expands or challenges your sense of consciousness.
Listen	Play "Spirits in the Material World." Notice one question, sound, or feeling that stays with you.
Create	Choose one pair of opposites - love/fear, light/dark, heaven/earth - and make your own artist's equation, drawing, or journal page.
Share	Share one insight with someone who might enjoy looking at the reflection through imagination rather than certainty.

A Closing Invitation

Create as much unmanifested consciousness (i.e. the force) that you can throughout the week, through the arts, breath, meditation, yoga, being of service, forgiveness, kindness, compassion and most importantly, love.

As heaven is calling and we need a critical mass to answer the call, by creating unmanifested consciousness, to create Heaven on Earth. Which makes you critical. For Heaven's sake, please know that.

AWAKENING WITH A.C. | COMPANION REFLECTION

Week 2: Theory of Relativity

A quiet place to explore what imagination, contrast, consciousness, and love awaken in you.

Before You Begin

Give yourself a little room to wonder. I want you to watch the Einstein, The Power of Love video, the Max Planck video, and the Yoda scene, without trying to master science or metaphysics. Then listen to "Spirits in the Material World." Notice what stays with you.

Reflect

- Where in my life do I experience the world most strongly through opposites - light and dark, love and fear, certainty and mystery?
- What part of me prefers knowledge and certainty because imagination feels too open or vulnerable?
- What might I need to unlearn in order to see my life - or the world - differently?
- Where has contrast helped me know love, peace, or light more clearly?
- If my thoughts help shape the world I experience, what thought would I most want to practice this week?
- What would it mean for me to choose love not just as an idea, but as a creative force?

One Loving Action

Choose one small, specific act that brings love into the material world this week. Write it here:

Media for the Week
